PROFESSIONAL SUMMARY

Information Technology graduate and full-stack developer experienced in web applications, mobile development, workflow automation, and data analytics. Delivered client-focused systems, integrated APIs, and developed Power BI dashboards. Technical strengths include JavaScript, C#, SQL, React, Node.js, system design, testing, and deployment.

TECHNICAL SKILLS

Languages & Web: JavaScript, C#, SQL, HTML, CSS, DAX

Frameworks & Libraries: React, Next.js, Node.js, Bootstrap, Tailwind CSS

Data & Platforms: Power BI, Firebase, Supabase, Google Maps API, Microsoft 365

Development Tools: Git, GitHub, Visual Studio Code, Unity, Cursor AI, n8n, BotCake

Additional: API integration, application testing and debugging, hardware/software troubleshooting, networking fundamentals, preventive maintenance

PROFESSIONAL EXPERIENCE

Freelance Application Developer | Commission-Based IT Projects | Nov 2025

- Developed a client-commissioned mobile navigation application integrating Google Maps API for real-time location tracking and route optimization.
- Managed the development lifecycle, including client requirements gathering, implementation, testing, debugging, and deployment.

Full Stack Web Developer & Data Analyst Intern | Madison 88 Business Solutions | Jun 2025 – Oct 2025

- Developed web applications and automated workflows across departments to streamline manual operational processes.
- Cleaned and organized complex datasets and built interactive Power BI dashboards for departmental performance tracking and planning.

SELECTED PROJECTS

Church Management & Reservation System | Full-Stack Developer & System Designer, Freelance

Stack: JavaScript, Tailwind CSS, Node.js, Supabase

- Designed and developed a church management and reservation platform supporting public church information and four user roles.
- Built booking and approval workflows for church events, ministry activities, and sacramental services, including staff approvals and priest decisions based on scheduling and availability.
- Implemented authentication, email verification, role-based access, and QR-code attendance tracking; deployed via GitHub Pages for testing and Hostinger for production.

Cybereum: Gamified Cybersecurity Education App | Developer Capstone Project, 2024–2025

Stack: Unity (C#), Firebase

- Led design and development of a gamified cybersecurity education mobile app for K–12 students, defining system flow and integrating DepEd-aligned modules with interactive gameplay.
- Validated with student users: 98.26% functionality, 100% compatibility across Android 10–14, and 3.76 MARS rating (Highly Acceptable).
- Evaluated at Saigon University, Vietnam; research accepted for oral presentation at ICTE 2025.

EDUCATION

Bachelor of Science in Information Technology | 2020–2026

Lyceum of the Philippines University – Cavite

CERTIFICATIONS & TRAINING

CCNAv7: Introduction to Networks | Feb 2024 | Lyceum of the Philippines University – Cavite **Cybersecurity**
SAP Business One – SAP BASIC | Mar 2023 | Lyceum of the Philippines University – Cavite
